

Certified Scrum Master

How to use Scrum to organize and run projects

Better business results, improved morale.

Scrum is the most popular of Agile methods. It can be used to manage any kind of work, from web sites to mainframe programs to telecommunications system development. Scrum is very different than traditional project management. Learn how to...

Transform and accelerate value to customers with Scrum.

Certified Scrum Master Training by Innovel will teach you about the Scrum framework, the roles, and the techniques to plan and implement Scrum in your projects.

This is a very interactive and enjoyable 2 day workshop style class with discussion exercises and group-oriented simulations.

We will show you how to deliver working, potentially shippable software every 1 to 4 weeks. The process is simple, repeatable and reliable.

We will work through exercises for planning and estimating and write user stories, a preferred format for agile requirements.

We will show you how Lean, Agile, and Scrum fit together to form principles, practices and thinking tools that can transform your organization.

The instructor Robin Dymond CST is an international consultant and trainer with 26 years in the software industry and 14 years of experience using Scrum. He has trained over 4000 people in Europe, Canada, Brazil and USA.
