

Scrum Team Training

How to work and collaborate using Scrum

Better business results, improved morale.

Scrum is the most popular of Agile methods. It can be used to manage any kind of work, from web sites to mainframe programs to telecommunications system development. Scrum is very different than traditional project management. Learn how to...

Improve teamwork and collaboration with Scrum.

Scrum for Teams training by Innovel is fun and engaging training. Participants learn by doing activities, discussing real scenarios and collaborating with team members on exercises. Scrum for Teams training will teach you about the Scrum framework, the roles, and the techniques to implement Scrum in your projects. Our goal is to provide team members with information and confidence to implement Scrum in your company right after training.

Scrum for teams is a one day introduction to Scrum. For a more in-depth course please see the two day Certified Scrum Master.

Innovel trainers are very highly regarded experts who have been using Scrum since 2002 and teaching it since 2006. Over 90% of all Innovel students "definitely recommend" Innovel's training to their colleagues.

We will show you how to deliver working, potentially shippable software every 1 to 4 weeks. The process is simple, repeatable and reliable.

The instructor Robin Dymond CST is an international consultant and trainer with 26 years in the software industry and 14 years of experience using Scrum. He has trained over 4000 people in Europe, Canada, Brazil and USA.
